

Internship at Alex Poulsen Architects

Alex Poulsen Architects is seeking talented and enthusiastic architect interns to join our team in Copenhagen.

As an intern at Alex Poulsen Architects you will get a varied internship, where you will take part in a wide range of tasks within the architectural profession. You will join a team of competent and ambitious colleagues, where you get the opportunity to work with projects within our specialist area - renovations, new construction, program and flow analysis, detailing, user involvement and client consultancy.

We expect you to be creative, dynamic and a talented architect and model builder. It is an advantage that you can express your ideas through hand drawings and through physical models. In addition, you need to have knowledge and experience with the AutoCAD, Rhino, Revit, and Adobe (Illustrator, Photoshop, and InDesign). You should preferably be undergoing an education within architecture for min. 3 years or have a finished Bachelor's degree.

The internship period will last at least 5 months - 37 hours a week.

Send CV and portfolio (max. 5 MB) to job@alexpoulsen.dk and write "Architect intern" in the subject field of your mail. The sooner you submit your application, the better. We have ongoing interviews with qualified interns.

We are looking forward to hearing from you.

About Alex Poulsen Architects

At Alex Poulsen Architects we are more than 20 dedicated architects and building designers. Our work contains new construction, transformation and renovation in Denmark and in other countries. Our specialty is to solve complex buildings where logistics and security at all levels have the highest priority. We have great success in advising clients within our area of competence, where we possess a special knowledge that creates value for the developer as well as the community.

As an intern at APA, you become part of an architecture practice where you get the opportunity to collaborate across disciplines and projects, and where we prioritize the architectural engagement and the social environment in the studio.
